

FEATURES

- Machined carbon fiber blades & carbon steel motor parts allow "Oil Free" Use
- Highest precision engineering ensures 600,000 cycles of use
- Internal silencer baffle reduces noise pressure to 78 dBA
- 0.9 HP motor ensures no slow down & clean break through even for larger diameter holes in high grade special alloy materials
- UT8893S series angle drills feature the same precision engineered angle head as the UT8891 series
- Motor parts 100% interchangeable with UT8728 die grinder series
- UT8893 series straight drills feature precision fully caged gears with needle bearings
- Best for: Continuous precision air frame work and general industrial applications
