

What's Turning Inside Matters

QUALITY GEAR

CUSTOM GEARS

Our Name Means Quality

Quality Gear takes pride in providing our unique gearing related manufacturing services. We can design new parts from scratch or replicate old and obsolete items from samples or customer drawings, delivering solutions that meet or surpass original specifications.

We combine the planning, design, programming, production, assembly and equipment capabilities of a large company with the innovation, precision and personal attention afforded by a one-on-one customer focused organization.
